

Napatech Honored with Two 2013 Network Products Guide Awards

COPENHAGEN, Denmark, May 21, 2013 – Napatech, the world's leading supplier of network analysis adapters, announced today that it has received two 2013 Hot Companies and Best Products Awards from Network Products Guide. The Napatech NT20E2-PTP real-time analysis adapter was a Bronze winner for Best IT Hardware, while Napatech's GTP tunneling support feature won the EMEA Hot Technologies category.

“The [NT20E2-PTP](#) adapter with the GTP tunneling feature provides a powerful solution for network equipment vendors that need to build analysis products, especially for mobile networks,” stated Erik Norup, President and CMO, Napatech. “We are pleased that Network Products Guide has chosen to recognize us with these two awards. They are a validation of our company's continued commitment to providing powerful network analysis solutions using standard servers.”

The NT20E2-PTP adapter makes [time synchronization](#) implementation easier for OEM vendors and end-users by providing the capability to plug directly into the PTP network. The nanosecond precision time-stamping capabilities can precisely measure jitter and delay in mobile networks, even at speeds up to 40 Gbps.

New tunneling protocol support extracts information from GTP tunnels to allow efficient analysis of applications and services used on mobile networks. Napatech adapters perform flow identification and intelligent distribution to multiple server CPU cores based on the contents of the tunnels, rather than on the tunnel itself. This enables Napatech telecom equipment vendors and their customers to accelerate their mobile data analysis application.

These industry and peer recognitions from [Network Products Guide](#) are the world's premier information technology awards honoring achievements and recognitions in every facet of the IT industry. Winners from all over the world were honored in Las Vegas on Tuesday, May 7, 2013 during the 8th annual dinner and presentations.

About Napatech

Napatech is the leading supplier of real-time analysis adapters with over 120,000 Ethernet ports deployed worldwide. Designed for use with Commercial Off-The-Shelf (COTS) servers, Napatech adapters enable rapid development of powerful appliances for high performance analysis. Napatech adapters guarantee real-time delivery of data at speeds up to 40 Gbps. Intelligent features allow network data analysis to be off-loaded, thereby accelerating application analysis for managing, securing and optimizing networks and services. When performance matters, the world's largest equipment vendors in telecom, enterprise, financial and government markets choose Napatech. Customers depend on Napatech for reliable delivery, complimentary maintenance and upgrades, and experienced global customer support. Napatech is headquartered in Copenhagen (Denmark) with offices in Mountain View, Andover, Washington D.C. (USA), Tokyo (Japan), Seoul (South Korea) and São Paulo (Brazil).
