NAPATECH PROVIDES SMARTER DATA DELIVERY FOR HIGH-SPEED NETWORKS

Napatech Helps Customers Go Beyond the Challenge of High-Speed Packet Capture to Expand the Scope of their Network Management and Security Applications

COPENHAGEN, Feb. 3, 2016 – The speed, complexity and amount of data in networks are increasing at explosive rates. Napatech (OSE: NAPA) today announced its commitment to smarter data delivery for network management and security applications. The company has developed a comprehensive portfolio of high-speed accelerators, value-added software and integrated platforms that capture data faster, more efficiently and on-demand. Visit www.napatech.com to learn more.

- **Faster time-to-market -** The company's patented technology delivers data from networks at high speed and volume with zero packet loss and enables real-time insight into network traffic. Napatech solutions, which scale up to 200Gbps, are integrated and preconfigured to help shorten customers' in-house development or time-to-market.

- **More efficient data capture at the packet level -** Napatech solves the issue of capturing large volumes of data with zero packet loss and provides time stamping of every frame with nanosecond precision. These high-performance features provide smarter data delivery to applications with extremely low CPU load.

- **On-demand data delivery –** Napatech Pandion is an integrated solution that gives customers the power to record, specify and retrieve data where, when and how they need it. Pandion is the solution of choice for OEM providers who want real-time capture and network recording capabilities to be included in their own solutions.

Henrik Brill Jensen, CEO, Napatech said:
"As data in networks continues to grow at explosive rates, the need to monitor and secure sensitive information is more important than ever before. We are proud to provide a comprehensive, high-performance, smarter data delivery portfolio to assist our customers in building equipment that is future-proof and ready to handle the data challenges of tomorrow, today."

ABOUT NAPATECH

Napatech is the world leader in data delivery solutions for network management and security applications. As data volume and complexity grow, organizations must monitor, compile and analyze all the information flowing through their networks. Our products use patented technology to capture and process data at high speed and high volume with guaranteed performance, enabling real-time visibility. We deliver data faster, more efficiently and on demand for the most advanced enterprise, cloud and government networks. Now and in the future, we enable our customers' applications to be smarter than the networks they need to manage and protect.

NO FORWARD-LOOKING STATEMENTS

This press release may be deemed to contain forward-looking statements. Readers are cautioned that these forward-looking statements are only predictions and may differ materially from actual future events or results due to a variety of factors, including, among other things, business and economic conditions and growth trends in the networking industry, our customer markets and various geographic regions; global economic conditions and uncertainties in the geopolitical environment other macro-economic factors and other risk factors set forth in Napatech's reports. Any forward-looking statements in this release are based on limited information currently available to Napatech, which is subject to change, and Napatech will not necessarily update the information.
