

Napatech Wins Danish Technological Communications Firm of the Year at 2014 Business Excellence Awards

COPENHAGEN, Denmark, July 9, 2014 - [Napatech](#) (OSE: NAPA), the world's leading supplier of accelerators for network management and security applications, announced it has been selected as winner of the Technological Communications Firm of the Year – Denmark at the [2014 Business Excellence Awards](#). This recognition is yet another reminder of Napatech's commitment to good business practices, forward-looking leadership and innovation in the networking industry.

Highlights:

- **The prestigious annual award is handed out by Acquisition International (AI)** to candidates thought to be leaders in a variety of fields and to honor the most respected companies worldwide.
- **Napatech is recognized for its business success, ethics and innovative products** in the networking industry that address explosive growth in data traffic.
- **The world's largest network equipment vendors in telecom, enterprise, financial and government markets rely on Napatech** for reliable delivery, complimentary maintenance and upgrades as well as experienced global customer service.
- **Napatech's products enable its customers' applications to run faster than the networks they need to manage and protect.** An example is its state-of-the-art accelerator, the [NT100E3-1-PTP](#), which enables flexible, scalable network applications at speeds up to 100 Gbps.

SUPPORTING QUOTE:

Dan Joe Barry, vice president of marketing, Napatech, said:

"We are proud to be recognized by AI as the Technological Communications Firm of the Year – Denmark. We are committed to keeping our customers one step ahead of the data growth curve by accelerating their applications and time-to-market, while reducing risk. This recognition underlines that we are not only delivering on this promise, but also conducting business responsibly and successfully."

About Napatech

Napatech is the world leader in accelerating network management and security applications. As data volume and complexity grow, the performance of these applications needs to stay ahead of the speed of networks in order to do their jobs. We make this possible, for even the most demanding financial, telecom, corporate and government networks. Now and in the future, we enable our customers' applications to run faster than the networks they need to manage and protect.
