

Napatech Honored in Three Categories at the 2015 IT World Awards

200G Performance Solution Wins First Place as Most Innovative Hardware

COPENHAGEN, July 1, 2015 – The explosion of data is forcing operators and service providers to address the challenges of not only understanding what services or applications subscribers are using, but moreover when and where they are using them. Today, Napatech (NYSE: NAPA) announced that its industry-first 200G Performance Solution won first place in the "Most Innovative Hardware" category and bronze for "Best IT Hardware" and "Performance Optimization."

With the 200G product, telecom companies are able to analyze information in real time, allowing them to tailor their solutions and offer new services. Product highlights include:

- **The Napatech 200G Performance Solution was developed through careful design** and consideration of the complexities of modern server architectures to overcome potential bottlenecks that have proven a hindrance in the past to network operators.
<http://bit.ly/1L02EvC>
- **The solution is based on two PCI-SIG® certified NT100E3-1-PTP accelerators**, each providing a single 100G port with full throughput and zero packet loss under all conditions. Upstream and downstream data are merged using an Intelligent Hardware Interconnect between accelerators. This allows specific flows to be combined and directed to the right CPU cores for processing in a balanced and controlled manner.
- **The world's largest equipment vendors in telecom, enterprise, financial and government markets rely on Napatech** for reliable delivery, complimentary maintenance and upgrades, as well as experienced global customer service.

Dan Joe Barry, VP positioning and chief evangelist, said:

"Being named a winner in these three categories is a testament to Napatech's constant drive for innovation and validates our mission to help our customers stay ahead of the ever-increasing data growth curve. We are excited to have our newest accelerator solution recognized by the IT World Award judges as an innovation in the market."

About Napatech

Napatech (NYSE: NAPA) is the world leader in accelerating network management and security applications. As data volume and complexity grow, the performance of these applications needs to stay ahead of the speed of networks in order to do their jobs. We make this possible, for even the most demanding financial, telecom, corporate and government networks. Now and in the future, we enable our customers' applications to run faster than the networks they need to manage and protect. For more information, visit us at www.napatech.com.
