

NAPATECH INTEGRATES PANDION WITH SPLUNK FOR 100 PERCENT NETWORK TRAFFIC DATA VISIBILITY

Integration Enables Complete Data Capture for Reduced Resolution Times and In-depth Forensic Analysis

COPENHAGEN, Denmark, October 27, 2016 – Lack of visibility into data traffic hinders network security efforts, both before and after an event has occurred. To rectify this issue, Napatech announced today that the Pandion network recorder is now fully integrable with Splunk, the leading platform for operational intelligence. This integration gives current Splunk users the possibility of having 100 percent visibility into network traffic data.

Splunk users now have access to a key component in their network infrastructure, the Napatech Pandion network recorder, for 100 percent data capture.

- **Instant insight into alarms:** The integration enables network security personnel to reduce the resolution times of events. The Splunk software triggers alarms, and when an unusual activity occurs in the network traffic, users can instantly get to the root of the problem.
- **Smarter data retrieval:** The Pandion recorder offers quick retrieval of the relevant data so that further forensic analysis and investigation can be done, with 100 percent data capture and zero packet loss to provide data that is also completely reliable.
- **A scalable security solution:** The scalability of Pandion offers a long-term solution that grows with users' increasing security needs.

To learn more visit us at booth 609, BlackHat Europe 2016. We will also be exhibiting at SuriCon 2016.

Peter Ekner, CTO, Napatech, said:

"The quicker an event can be identified, the quicker it can be resolved. This integration gives Splunk users faster resolution times, which means more robust security. Complete data capture enables quick access to relevant data in the case of a breach, and further forensic analysis can also be initiated quickly. The integration provides an overall reduction in costs and resources needed to maintain users' cybersecurity operations. We're pleased to work with Splunk to offer this valuable integration."

ABOUT NAPATECH

Napatech is the world leader in data delivery solutions for network management and security applications. As data volume and complexity grow, organizations must monitor, compile and analyze all the information flowing through their networks. Our products use patented technology to capture and process data at high speed and high volume with guaranteed performance, enabling real-time visibility. We deliver data faster, more efficiently and on demand for the most advanced enterprise, cloud and government networks. Now and in the future, we enable our customers' applications to be smarter than the networks they need to manage and protect.

NO FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements which are only predictions and may differ materially from actual future events or results due to a variety of factors, including but not limited to, business conditions, trends in the industry and markets, global economic and geopolitical conditions, macro-economic factors, and other risks and uncertainties set forth in Napatech's reports. The matter discussed in this release is based on current expectations and maybe subject to change. Napatech will not necessarily update this information..
