

NAPATECH SECURES NEW DESIGN WIN IN CHINA WITH NEUSOFT

Neusoft Teams with Napatech's FPGA-based SmartNIC Software and Hardware for Network and Application Performance Monitoring

COPENHAGEN, Denmark, July 3, 2018 – Napatech™ (OSLO: NAPA.OL), the leading provider of reconfigurable computing platforms, today announced a new design win for its FPGA-based SmartNIC software and hardware in Neusoft's RealSight™ APM network application and management system, to support the company's aim of further expanding into the domestic and international markets.

Neusoft is a leading IT solutions and services provider in China with more than 20,000 employees globally. Neusoft's RealSight product provides graphical, real-time application, network and service monitoring that is widely deployed by IT organizations across many industries, with notable deployments in Tier-1 telecom operators within China, financial markets and medical sectors.

Neusoft's Platform Software Division wanted to expand its Application Performance Monitoring (APM) solution to include Network Performance Monitoring (NPM) functionality to create a single-pane view for networking, applications and services. Napatech uniquely met Neusoft's requirements of improving system performance from increasing network speeds; massively scaling the number of users for the demands of international telecom deployments; and maintaining the benefits of an open and standard platform, including lowered costs and easy integration with existing software.

Li Xu, product technical director, Platform Software Division, Neusoft, said:

"We are really pleased to be working with Napatech on this new project that will benefit service providers, data centers and enterprises. Napatech's feature-rich SmartNIC software and hardware easily integrated into our solution to meet the demanding performance requirements we have for throughput, latency, scalability and cost."

Ken Way, chief sales officer, Napatech, said:

"Neusoft Group is a recognized leader among many APAC IT solution and services providers. Its Product Platform division offers cutting-edge solutions to the most advanced cloud, data center and telecom networks in APAC and around the world. We are pleased that Napatech and Neusoft collaborated to provide best-of-breed solutions in network monitoring and performance management to global customers."

ABOUT NAPATECH

Napatech helps companies to reimagine their business by bringing hyperscale computing benefits to IT organizations of every size. We enhance open and standard virtualized servers to boost innovation and release valuable computing resources that improve services and increase revenue. Our Reconfigurable Computing Platform™ is based on a broad set of FPGA software for leading IT compute, network and security applications that are supported on a wide array of FPGA hardware designs.
